

NestEye Platform

NestEye Platform

NestEye is an intelligent management platform that enables consumers to understand and take control of their home energy profile!

It allows homeowners to reduce or shift energy use during peak times, and helps electricity providers improve grid efficiency and network reliability.

By making energy load / production visible, consumers can now manage, control and reduce energy costs, and improve their carbon footprint like never before.

Don't just be smart. Take control of your energy use anytime, anywhere.

Intelligent Data Analytics

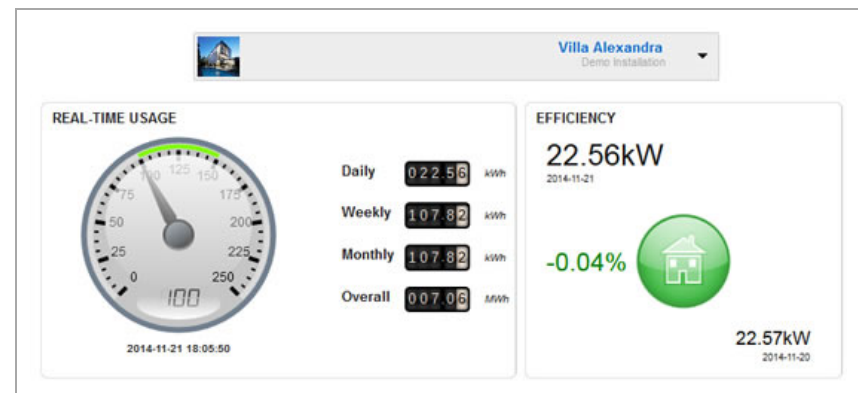

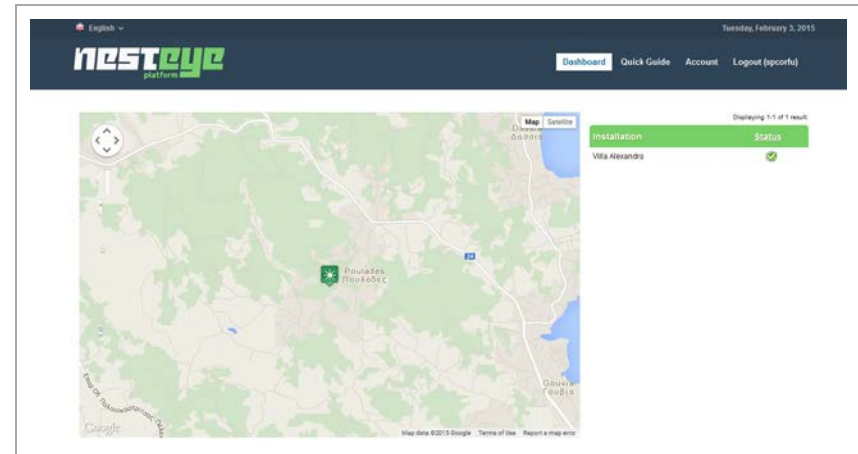

Track Key Performance Indicators through multiple metering devices, sensors and actuators. Set energy goals and track your progress. View informative reports on real-time and past energy data.

Customize in Almost No Time

NestEye seamlessly connects different technologies and devices, and turns them into a single user-friendly solution.

Explore the features and capabilities for including additional consumptions through water and gas meters. Integrate an IP camera and see your home - away from home.

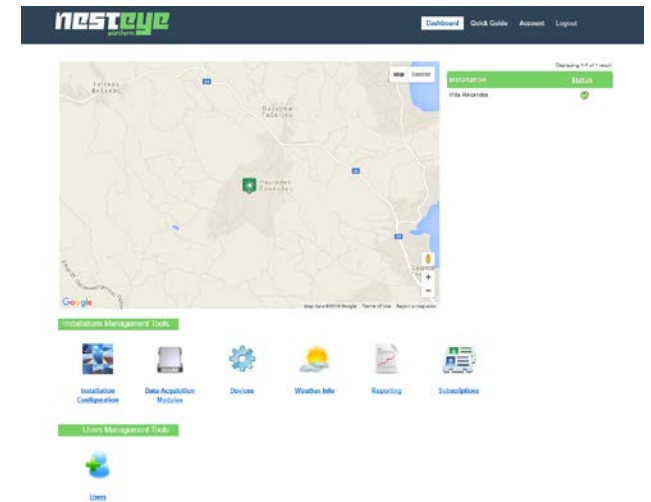

Smart Energy Management

The NestEye Home

Complete cloud-based platform,
accessible from everywhere.

Easily view, monitor, and manage
energy usage with intuitive
interfaces and reports.

Different interfaces for end users
and building operators, responding
to their individual needs.
